## Detaljer:

A short distance from the natural beach of Es Trenc, a modern, private residence with a total of 69 contemporary apartments is being built. Residents will have access to spacious communal areas, including a saltwater pool, lovingly designed Mediterranean gardens and a fitness area. Energy is supplied by a sustainable heat pump, which supports both the air conditioning and heating systems and ensures a pleasant living climate all year round - cool in summer and warm in the cooler seasons.

All apartments boast modern architecture and high-quality furnishings. Great attention is paid to the use of high-quality materials. The basic equipment includes hot and cold air conditioning and underfloor heating in the bathrooms.

The penthouse units on the upper floor are equipped with balconies and private roof terraces. Different floor plans allow for flexible use and adapt to different living requirements. The first floor apartments have additional covered terraces

Each residential unit has its own parking space with charging facilities for electric vehicles. The energy required is generated by photovoltaic systems installed on the carports.
