Detaljer:

This flat plot of land is situated in an excellent location between Campos and the natural beach of Es Trenc.

A basis project already exists, and the final project is expected within a few months when the construction can be started.

Access is via a paved road, and the plot already has a small area with almond trees and unobstructable views. In the extensive surrounding countryside new fincas are planned. According to the plans the power supply will be by means of solar energy, with a cistern assuring a dependable water supply which will thereafter be supplied by water from external sources.

This popular finca area is within 5 minutes drive of the village of Campos as well as the natural beach of Es Trenc.
